

Products

Figaro™ is available with a built-in amplifier (F-Amp) or in a passive version (F-Fil).

For both solutions of Figaro™ you can require all the product components mounted on a practice MDF board or keep them ungroup, to ease your own installation.

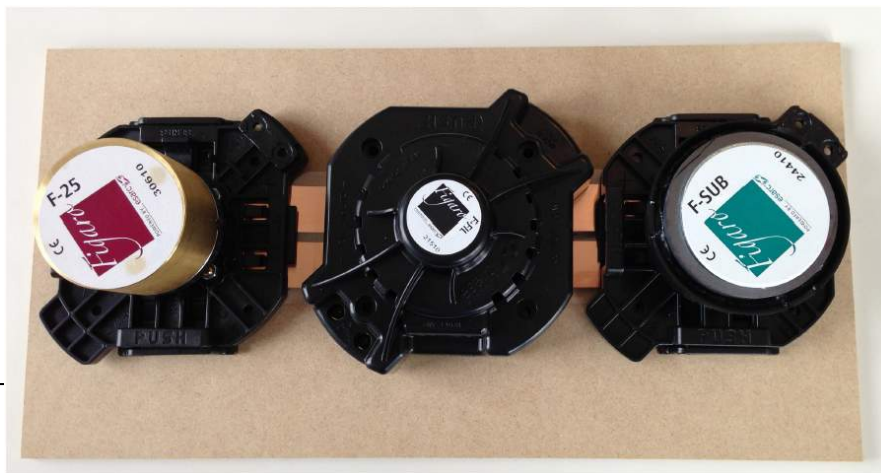

Figaro F-Fil

Figaro™ F-Fil is equipped with a 2 way crossover.

Unlike the amplified version, the speaker needs to be connected to an external amplifier.

This system enables to create special audio tools like the Surround 5.1 o 7.1 effects, or far-reaching integrated solutions like the equipment P.A.100 Volts.

Figaro F-Fil (2 way crossover)

System: passive acoustic speaker Hi-Fi 2 way

Dimensions and Weight: 35.5 x 18 x 8.5 cm 1,150 kg

Impedance: 4 Ohm

Maximum Power: 25 Wrms

Frequency Response: 53Hz – 20kHz

Connections: possible 100V line through transformer line
100V-25W 4 Ohm

Angle Degrees: >180

Installation: invisible, behind false-ceiling/wall/panel
